

J.L. Fisher
Motion Picture & Television Equipment

Caution: Use proper lifting techniques when lifting dolly.

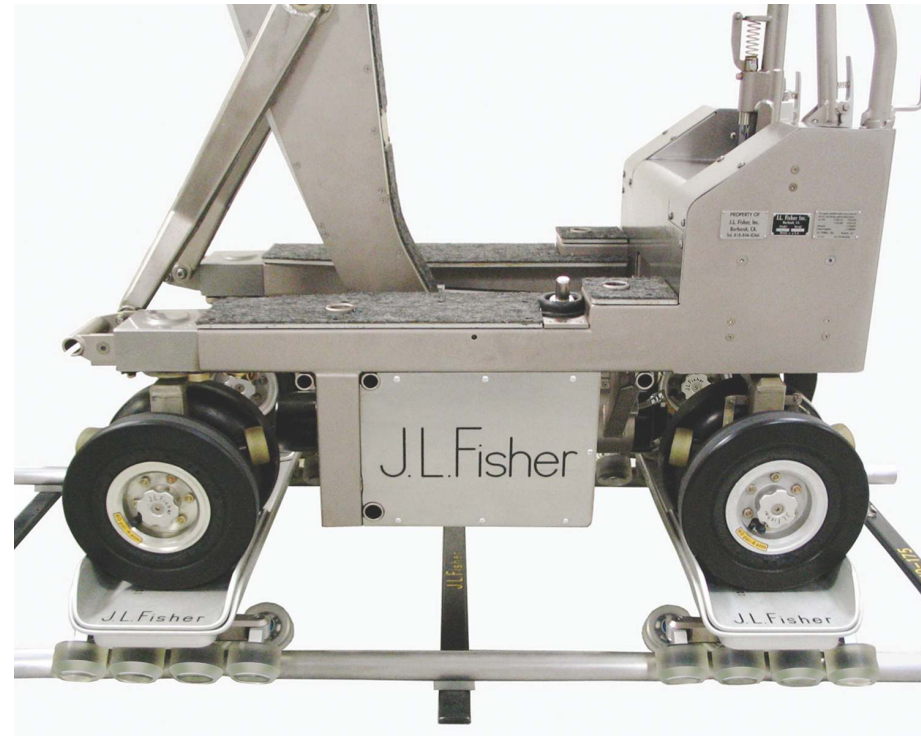

The skateboard wheels incorporate articulating trucks allowing all 32 wheels to maintain contact with the track for better control and stability, on both straight and curved round track. Wheels are precision ground for smoother quieter operation.

J.L. Fisher Skateboard Wheels (SBWS)

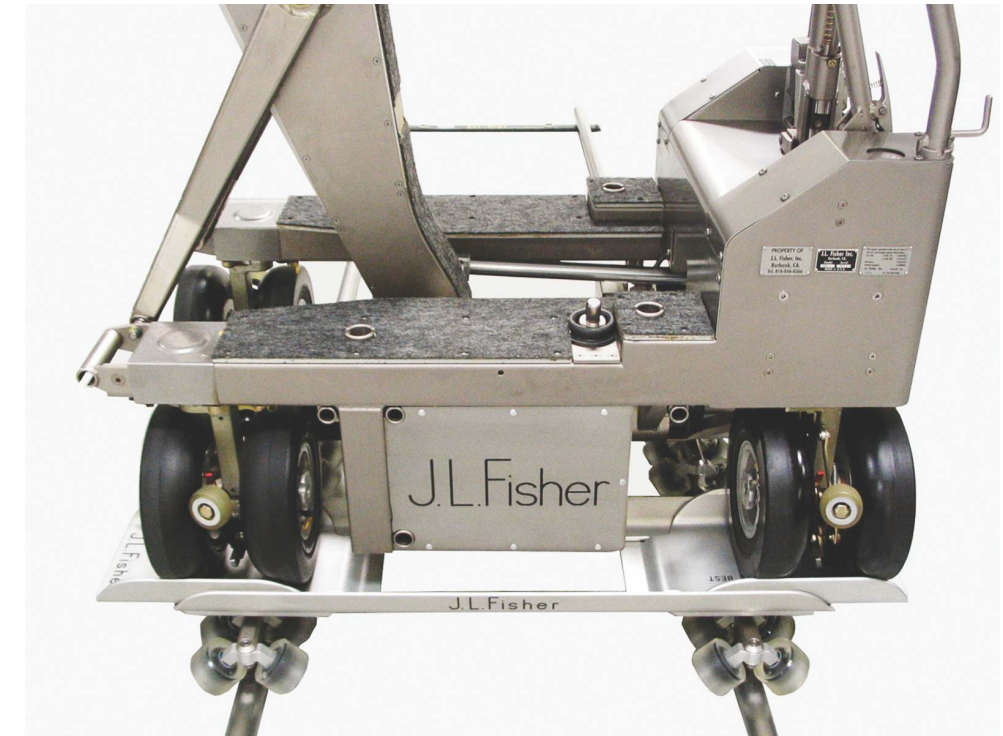

Note: Maximum weight on Skateboard wheels is 1200 Lbs. (544kg)
Works perfectly on a radius as small as 5'.

10 Dolly - mounted on standard 24.5 inch track
(With no insert trays)

11 Dolly - mounted on standard 24.5 inch track
(With insert trays)

11 Dolly Sideways - mounted on standard 24.5 inch track
(With insert trays extended)

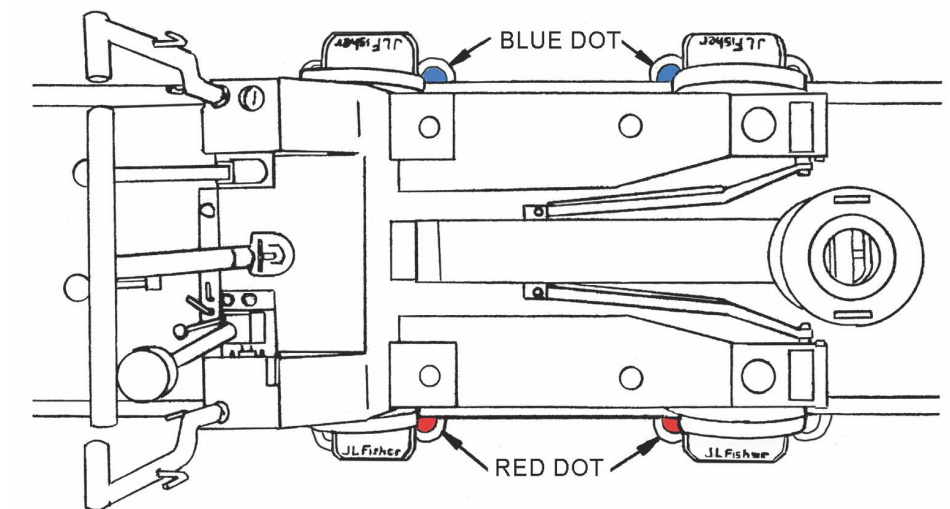

10 Dolly
The channel properly fits the wheel.
Notice the three points of contact.

11 Dolly
Note: The trays are used for the Model 11 dolly;
allowing a perfect fit to the wheel. Notice the
three points of contact.

SBWS
Kit Includes: Case
SkateBoard Wheels (2)
Insert Trays (4)
Placard (the one in your hand)

Note: When placing the skate board wheels onto the track,
the red dots on the trucks must be on one side of the track,
and the blue dots on the other side of the track.
